

Part 1

The Battle of Neighborhoods

Data

To solve this problem, we will need below data:

- List of neighborhoods in Toronto, Canada
- Latitude and Longitude of these neighborhoods
- Venue data related to American restaurants. This will help us find neighborhoods that are more suitable to open an American Restaurant.

EXTRACTING THE DATA

- The scrapping of Toronto neighborhoods via Wikipedia
- Getting Latitude and Longitude data of these neighborhoods via Geocoder package
- Using Foursquare API to get venue data related to these neighborhoods
